

YDreams Vision

Spatial is Special

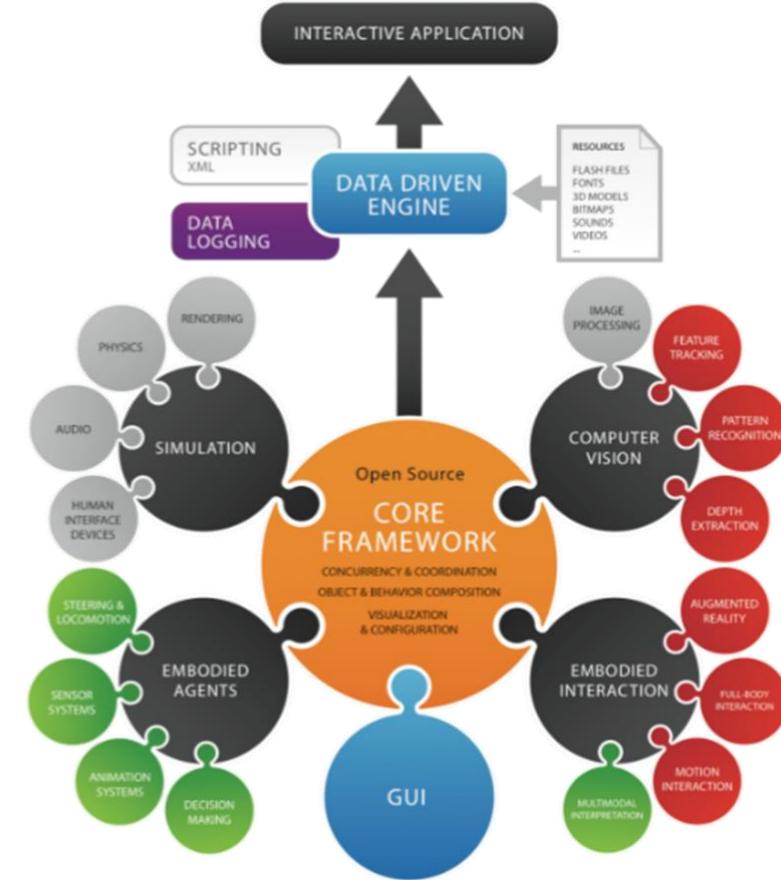

October 8th, 2023

Y-Labs vision

The Y platform is a revolutionary set of spatial computing tools merging AI, AR, and VR

This platform has been used, in its early Yvision version, to create “the treasure”- see The YDreams Collection

Investment will enable its transformation into a platform that may be used by anyone to index, organize, compose, immerse, and provide intelligence to the Real and Virtual Worlds. The Y platform intends to be the creator’s ideal set of tools to build the Spatial Internet

YDreams Vision team

Management

Haydn Rigby

[Antonio Camara](#)

Edmundo Nobre

Financing

[Jorge Costa Oliveira](#), former Secretary of Foreign Investment- providing access to Portuguese, EU, and Asian funds

[Paul Stamoulis](#), Jerry McRoberts, Robert Kirk- providing access to trusted investors, a social network of 100.000 investors, family offices and institutional funds in the US

Technical and business support

[Diogo Almeida](#)

[Ken Pimentel](#)

[Kris Kolo](#)

[Manuel Lima](#)

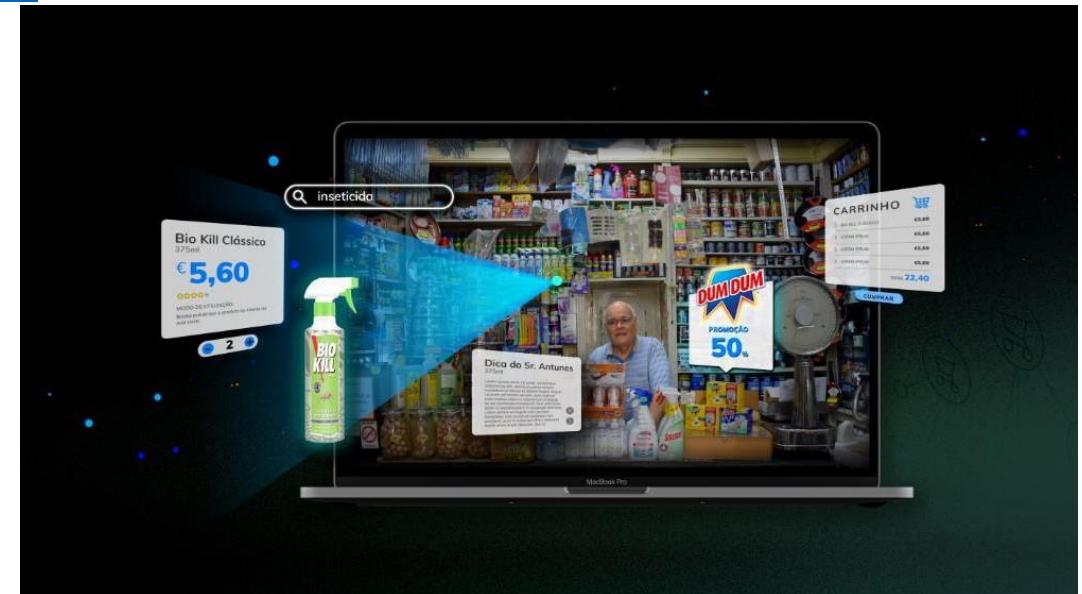

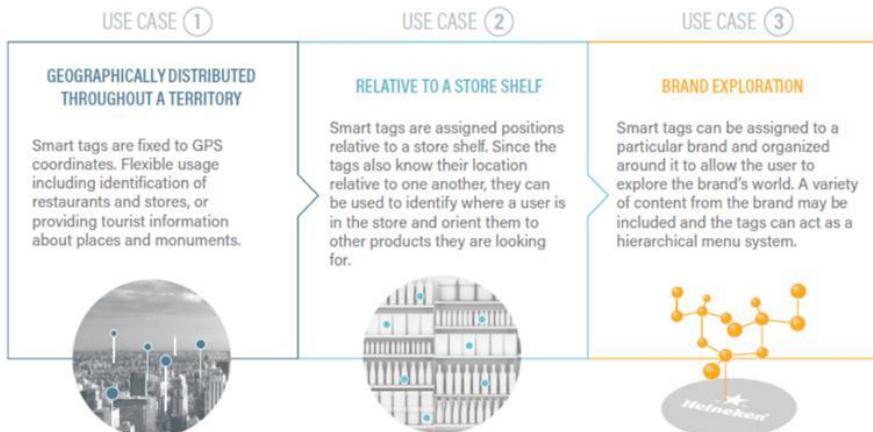

[Ross Plummer](#)

Y platform

Indexing and Composing

Spatial computing (AI/AR/VR) will enable hyperlocal indexing and composing with global impact: see [Lisbon pilot project](#)
